Introduction

Greetings,

The Sponsored Programs Administration (SPA) team is pleased to provide the FY22 Annual Report. Faculty and staff continue to be successful in securing external funding and SPA congratulates them on their achievements.

This year, NIU faculty and staff secured 371 awards totaling $48.6M. These awards include funding for programs specifically targeting COVID-19 recovery efforts.

Without COVID-19 funding, total funding this year was $42.3M. This represents a 39% increase in sponsored funding over the last five years.

Consistent with NIU’s sponsored programs portfolio, funding from federal and State of Illinois agencies accounts for most of the funding this year.

Top federal funders are the Department of Education, National Science Foundation, Argonne National Laboratory, National Institutes of Health, and Department of State.

This broad range of funders exemplifies the expertise of our faculty and staff and the scope of NIU’s programs. Indeed, these programs advance the academic and research mission of the university and prepare our society for a century of change.

On behalf of the entire SPA team, congratulations to those who secured external funding and thank you for all who submitted funding proposals this past year.

Regards,

Dara C. Little, MPA, CRA
Assistant Vice President for Research and Sponsored Programs

Report Notes
Report Notes and Definitions

Annual Report Reporting Period
The fiscal year (FY) for NIU is July 1 to June 30. This report includes data for all awards and proposals processed through SPA during the FY 2021 period. An award is considered processed by SPA when it has been reviewed, signed (if necessary), assigned a grant account number, and a SPA notice of award has been sent to the Principal Investigator(s). A proposal is considered processed through SPA after the institutional review and sign off process is complete and the proposal has been submitted to the funding agency.

Definition of Award
An award is a funded project for which NIU has received an official notice of award or executed contract from a sponsor requiring the university to undertake a particular activity and for which a deliverable is expected. Awards that provide full funding in the first year of a multi-year project are included in the fiscal year the award was made. Award dollars received from sponsors that provide funding for specific budget periods within a multi-year project (i.e. incremental awards) are included in the fiscal year for which funding is received. Consequently, funding can fluctuate for a department or college depending on how a project is funded. Direct year by year comparisons should always be made with caution.

Definition of Proposal
A proposal is a request for external funding support for a particular activity that is routed through SPA. There is no correlation between the proposals and awards in this report.

Sponsor Types
SPA recognizes five categories of funders: federal, state, corporate, public/nonprofit, and foreign. All amounts in this report are based on the originating source of funding. Sources of funding through the report include both direct and pass-through funding (e.g. when a state agency passes federal funds through to NIU these funds are reported as federal dollars). Public/nonprofit sponsors include non-Illinois institutions of higher education, municipalities, civic organizations, as well as non-profit and non-governmental organizations.

Intellectual Credit
For projects that have multiple Principal Investigators and Co-Principal Investigators, the total award is allocated to the lead or contact Principal Investigator (PI) and his/her respective home academic unit or center. All other Principal Investigator’s and Co-Principal Investigator’s participation is indicated with a notation under their home academic unit or center to see the lead or contact Principal Investigator’s entry for complete award details.
Research Center Credit
Involvement of a research center or interdisciplinary unit is noted in the individual award sections for each activity type.

Research
Research and development include both basic and applied research activities undertaken in order to increase knowledge – including knowledge of humankind, culture, and society.

Basic Research: Experimental or theoretical work undertaken primarily to acquire new knowledge of the underlying foundations of phenomena or observable facts without any participation or application in mind.

Applied Research: Original investigation undertaken in order to acquire new knowledge to meet a specific, recognized need and to solve practical real-world problems.

Instruction
Instruction defines teaching and training activities of the institution that are intended to elicit some measure of “educational change” in a learner or in a group of learners. Instruction includes all teaching and training activities, whether offered for credit(s) towards a degree or certificate, on a non-credit basis, or through regular academic departments or separate divisions, such as a summer school division or an extension division.

Other Sponsored Activities
These programs include public service programs that bring the various resources and capabilities of NIU to the community to respond to a local need. Other types of sponsored activities include student support programs, testing and evaluation activities that do not meet the definition of research, joint appointment agreements, and some workshop and travel grants.
